SUMMARY

Backend engineer building production systems from 0 → 1. Sole backend developer at an early-stage startup, navigating **3 product pivots** and shipping to real schools. Experienced in distributed microservices, event-driven pipelines, real-time systems, and CI/CD automation.

WORK EXPERIENCE

SDE Intern — Neeto (BigBinary)

Feb 2026 – Apr 2026

- Expanded automated coverage across **4 SaaS products** using Playwright + TypeScript, replacing manual QA on critical user flows.
- Built NeetoCI pipelines with **4-shard** parallelised Playwright runs, PR-label triggers, and GitHub/Slack notifications.

Founding Backend Engineer — Bricks Education

Apr 2025 – Sept 2025

- Sole backend developer across **3 product pivots** (LMS → social platform → school curriculum); shipped each iteration from scratch in Spring Boot.
- Built course delivery, assignment submission, and student-interaction APIs; onboarded **2 schools** in Pilani and iterated on live user feedback.

PROJECTS

Namora Food Delivery Platform

 [GitHub](#)

- Architected **8 Spring Boot microservices** with Eureka discovery and API Gateway for centralised routing and auth.
- Replaced synchronous order-dispatch with a **Kafka event pipeline**, decoupling failures from order confirmation.
- Modelled rider locations as **Redis GEO entries** (GEORADIUS); **JWT RBAC** across **4 roles** with refresh token rotation.
- JMeter load test: **54 req/s**, **P95 169 ms**, **0.8% error rate** across **40 endpoints**; stress-tested to **20,000 requests**.

Studi.io — Real-time Collaborative Study Platform

 [Live Demo](#)

- Built real-time study rooms with **Socket.IO** — room-scoped broadcasting, live presence across concurrent sessions.
- Secured with **JWT access/refresh rotation**, HTTP-only cookies, OTP via SendGrid, and Socket.IO middleware for room auth.
- Server-side pagination (**50 messages/page**); Cloudinary via Multer; Redux Toolkit + Axios interceptors for state and error handling.

EDUCATION

2024 – 2027 Bachelor of Science in Computer Science at **BITS Pilani**

(CGPA: **8.7 / 10**)

ACHIEVEMENTS

- Meta × HuggingFace RL Hackathon — **Rank 158 / 15,000+** teams worldwide.
- LeetCode — **500+ day** daily streak.

SKILLS

Languages	Java, JavaScript, TypeScript, Python
Backend	Spring Boot, Node.js, Express.js, Kafka, JWT, Socket.IO, RESTful APIs
Databases	MySQL, PostgreSQL, MongoDB, Redis
Frontend	React, Next.js, Redux Toolkit, Tailwind CSS
Tools & DevOps	Git, Docker, GCP, CI/CD, Playwright, JMeter, Postman
